junaid-faiz.pk • github.com/Junaidfaiz1 • linkedin.com/in/junaid-faiz

SUMMARY

Full Stack Developer with 3 years of experience building and shipping production web applications across the JavaScript and TypeScript stack. Delivered AI-powered features to live products using the OpenAI API, LangChain, and LangGraph, including a streaming chatbot with function/tool calling and an AI document analysis pipeline. Strong across React, Next.js, NestJS, GraphQL, and MongoDB, with hands-on experience deploying and maintaining production services on AWS EC2. Focused on performant interfaces, scalable APIs, and secure role-based systems, working asynchronously with distributed teams.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, Redux, Tailwind CSS, shadcn/ui, Bootstrap, React Hook Form, Formik, Zod

Backend: Node.js, NestJS, Express.js, GraphQL, REST APIs, Socket.io, WebSockets

AI / LLM: OpenAI API, Anthropic Claude API, Google Gemini API, LangChain, LangGraph, function/tool calling, prompt engineering, generative and agentic AI

Databases: MongoDB, Mongoose, Prisma ORM

Cloud & Deployment: AWS EC2, AWS S3, AWS SES, Nginx, PM2, SSL/HTTPS setup, Linux server administration, Vercel

Integrations: Stripe, PayPal, LiveKit, JWT authentication, role-based access control

Tools: Git, GitHub, Postman, npm, Figma

EXPERIENCE

Full Stack Developer — Cipher Developers **Jan 2024 – Present**

Software development agency building web platforms and SaaS products for international clients • Lahore, Pakistan

- Built and shipped Dent-Ment, a professional networking and learning platform for the dental community, covering social feeds, mentor–student booking, events, live audio group calls, and course management with quizzes.
- Engineered AI-powered features with the OpenAI API: a streaming chatbot using function/tool calling for real-time data retrieval, and a contract analysis tool combining PDF parsing with legal reference comparison.
- Designed and built REST and GraphQL APIs in NestJS with Prisma and MongoDB, powering both the client application and a separate role-based admin platform.
- Deployed and maintained production services on AWS EC2, including the Next.js admin panel and a self-hosted LiveKit server for live audio — configuring Nginx reverse proxy, SSL certificates, PM2 process management, and environment-based release workflows.
- Implemented JWT authentication and role-based access control across 4 user roles, with a Next.js admin panel for user moderation, community and company management, permissions, and activity logging.
- Reduced initial page load time by approximately 40% through route-level code-splitting, lazy loading, and image optimization.
- Integrated third-party services including AWS S3, AWS SES, Stripe, PayPal, and LiveKit, and built responsive, accessible interfaces in React and Tailwind CSS.

Full Stack Developer (Intern) — Techie Tribe **Oct 2023 – Dec 2023**

Leading Software & Product Development Agency • Lahore, Pakistan

- Developed REST APIs with Node.js, Express.js, and MongoDB to support core frontend features.
- Built reusable, responsive React UI components using hooks and state management.
- Improved application load performance through lazy loading and code-splitting.
- Integrated third-party APIs to extend product functionality.

PROJECTS

Dent-Ment — Professional Network for the Dental Community dent-ment.com

Next.js · React · NestJS · GraphQL · Prisma · MongoDB · OpenAI API · LiveKit · AWS EC2

LinkedIn-style platform with social feeds, mentor–student booking, events, live audio group calls, and course management, plus a role-based admin panel, an AI chatbot with tool calling, and an AI contract analysis tool. Full technical detail under Cipher Developers above.

Technova CRM — Business Operations Platform for Agencies technova-crm.vercel.app

Next.js · TypeScript · GraphQL · Node.js

Multi-tenant SaaS covering the full client lifecycle — leads, opportunities, bidding, proposals, contracts, projects, invoices, and project-level profitability. Built separate client and freelancer portals with organization-scoped data isolation, server-side role-based permission checks on every sensitive GraphQL mutation, tokenized invite and password-reset flows, and audit logging.

Lubaan Roots — Skincare E-Commerce Platform lubaanroots.com

Next.js · Stripe

eCommerce storefront for skincare products including Frankincense oil. Built a responsive Next.js frontend with product listings, cart, and a Stripe-powered checkout flow, backed by order and product management.

VORQEN — Gaming Hardware Marketplace with PC Builder vorqen-fawn.vercel.app

Next.js · TypeScript · Stripe

eCommerce platform with an 8-slot PC configurator that validates component compatibility — CPU socket, memory generation, GPU clearance, PSU wattage margin, cooler rating, and case form factor — on the server rather than in the browser. Pricing, stock, and the Stripe charge amount are all computed server-side as a single source of truth.

EDUCATION

Bachelor of Science in Information Technology **Sep 2020 – Oct 2024**

University of Education, Lahore, Pakistan

CERTIFICATIONS

- Full Stack Developer Bootcamp — Bitbash
- Advanced React — Udemy
- Git & GitHub (Advanced) — DataCamp
